

World Book Day

Murder Most Unladylike

Murder most unladylike, written by Robin Stevens is a fantastic piece of historical detective fiction.

It is always the same, old, boring investigation such as Lavinia's missing tie for the Wells and Wongs detective society, until... They discover the dead body of the science mistress (Miss Bell)! After 5 minutes of getting help, Miss Bell's corps disappears. Now they have to solve the investigation before the killer strikes again. Will they ever bring the murderer to justice?

I love this book so much! You never know who the culprit could be. There are so many conspiracy theories. The shocking and intriguing event is when they really find out who the murderer is.

I highly recommend this mysterious book. You can never put it down!
